## SKILLS

- **Languages:** HTML, JS, CSS, C#
- **Frameworks:** Express.JS, Redux, ASP.NET, Angular
- **Libraries:** Node.JS, React, jQuery, Bootstrap, Flex-Box, Passport.JS
- **Databases:** MS-SQL, MongoDB
- **Technologies:** Web API, MVC
- **CI/CD:** GIT, AWS

## In a developer role at your company I will...

- Code within company coding standards and styles.
- Learn how to leverage the current CI/CD pipeline in place.
- Build responsive frontend designs to spec per the UX design.
- Develop strong working relationships with coworkers.
- Diligently prioritize multiple projects to ensure timely results.
- Be coachable and inviting of constructive criticism.

## EXPERIENCE

### Freelance Developer - DevMakers

Irvine, CA Jan-Mar 2021

Contracted to assist the development team with creating an educational curriculum with a focus on the professional development of software engineers looking to progress in their careers. Additional tasks include creating a company website.

- Assisted founders in creating lesson plans, curriculum, and interactive labs.
- Built an internal learning management system to onboard students and track their progress.
- Provided feedback on hundreds of draft lesson plans and guidance on improvements.
- Contributed to the development of curriculum plans and course outlines.

### Full-Stack Developer - Everyonic

Irvine, CA Jan 2020-2021

Contracted to assist a team of three developers in the development of two projects. The first was a large full-scale online betting platform that allowed users to bet on competitive fantasy and real-world sports leagues. The second was creating a customized admissions process for the Golden West College's online registration.

- Responsible for the deployment of an express backend API using the Express Framework and other third party APIs.
- Developed a front-end interface built with react for users to place bets.
- Designed a database solution to track user transactions such as wins, losses, account balance etc.
- Customized a webform with logical markers with form validation using ReactJS.
- Created a dynamic PDF pulling data from a MongoDB endpoint.
- Used Postmark API to generate emails to recipients and department heads.

### City Of Anaheim - Information Developer

Anaheim, CA Aug 2019-Jan 2020

Assigned to the city of Anaheim's applications and information development team.

- Maintained the City of Anaheim's Insider Web Application.
- Conducted meetings with city employees to discuss potential new applications and or new application features.
- Created several WinApps and MVC projects in Visual Studios and C#.
- Used SDLC (System Development Life Cycle) and BPMN (Business Process Model Notation) principles to create an application mockup.

### Redwood Code Academy - Teaching Assistant

Irvine, CA Jul-Oct 2019

Provided instruction, evaluation, and immediate feedback to 20+ students across multiple classes in HTML, CSS, GIT, JS, jQuery, React, Node, MongoDB, and .NET.

- Effectively taught students of varied academic/ age levels and diverse cultural backgrounds.
- Assisted with classroom instruction, while communicating with teachers and administrators about course objectives.
- Hosted independent tutoring sessions with students to discuss different ways of imagining and working through problems and facilitating to conceptualize program thinking.
- Reviewed all merge requests for over 100 students' created GIT repositories.

## EDUCATION

### Antioch University - Web Development Certification

Culver City, CA 2017

Learned industry best practices and practical software development standards with a focus on HTML5, CSS3, JavaScript, Node.JS, React, Redux, algorithms, and data structures. I created and deployed applications while learning new languages and frameworks by collaborating several hours every week with mentors and senior web developers.
